PROFILE

Full Stack WordPress Developer with 2+ years of experience building custom, production-grade WordPress platforms. Experienced in custom plugin development, membership systems, booking engines, WooCommerce solutions, CRM integrations, and business automation tools. Currently working at a WordPress agency delivering 10 to 15 client projects per month, ranging from small bug fixes to full builds worth \$2,500 and above. Delivered 11 projects last month with 10 rated 5 stars, and over \$3,000 in project value solo this month. Comfortable owning projects end to end: planning, development, testing, client communication, and post-launch support. Regular experience working with clients across the US, UK, and Australia.

CORE SKILLS

WordPress Development: Custom Themes, Child Themes, Plugin Development, WooCommerce, Hooks & Filters, AJAX, REST API, Custom Post Types, Taxonomies, Advanced Custom Fields (ACF)

Page Builders: Elementor Pro, Gutenberg, Divi, WPBakery

Integrations: Stripe Payment Gateway, Google Maps & Distance Matrix, Paid Memberships Pro, Tutor LMS, Fluent Forms, SMTP, Bitrix24 CRM, Zoho CRM

Analytics & Tracking: Google Tag Manager, GA4, Google Ads conversion tracking, conversion deduplication, Google Search Console

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), jQuery, Responsive Development

Backend: PHP, MySQL, Laravel, Filament

Performance & Optimization: Core Web Vitals, caching, image optimization, page speed, schema, sitemaps, canonical URLs, redirects

Workflow & Tools: Git & GitHub, staging environments, FTP/FileZilla, Hostinger, LiteSpeed, Claude Code, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

FB International BD, WordPress Developer

01/2026 | Dhaka, Bangladesh

- Deliver 10 to 15 client projects per month across a wide range of scope, from \$20 bug fixes to \$2,500+ full-stack WordPress builds
- Delivered 11 projects last month with 10 rated 5 stars, consistently ahead of monthly targets
- Build custom WordPress plugins for booking systems, CRM integrations, WooCommerce, and subscription workflows
- Integrate Stripe payments, Google Maps API, Zoho CRM, and SMTP email automation
- Implement GTM, GA4, and Google Ads conversion tracking with production QA and rollback preparation
- Own full project lifecycle: planning, development, client communication, deployment, and maintenance

EDUCATION

B.Sc. in Computer Science & Engineering,
North South University, Dhaka

FEATURED PROJECTS

Vault Labs Research 

- Turned a standard WooCommerce store into a custom lab research commerce platform
- Built 20+ custom modules via hooks/filters only, keeping WooCommerce core untouched
- Dual-mode purchasing (wholesale + single-kit), Store Credit system, COA document management
- Configurable multi-carrier shipping engine and frontend performance optimization

OnRoute Couriers 

- Built a multi-step courier booking and instant-quote system end to end
- Dynamic pricing engine via Google Distance Matrix; Stripe Checkout with webhooks
- GTM, GA4, and Google Ads conversion tracking with Stripe-aware deduplication
- Production tracking audit and responsive booking UI across devices

California Landlords Union 

- Took over a stalled build under a live launch deadline; fixed registration and payment issues
- Built a custom member dashboard (Astra child theme) with tabbed navigation
- Integrated Paid Memberships Pro (3 tiers) with Tutor LMS and auto-generated Member IDs

LaBeng 

- Built the full custom theme from scratch, no page builder
- Dual customer/business authentication and a booking system with dynamic availability
- Fixed a registration timeout by rebuilding synchronous email as an async workflow

Welding Leads 

- Built a subscription-based lead CRM from scratch with role-based dashboards
- Weighted lead distribution logic with automated email delivery
- Fixed a performance bottleneck by replacing LIKE queries with an indexed lookup table

Financial Application Automation System 

- Multi-step onboarding form with automated bank routing and approval tracking

STRENGTHS

- High-volume delivery: 10 to 15 projects per month
- Strong on-time delivery record
- Custom theme and plugin architecture
- WooCommerce engineering without breaking updates
- Membership and LMS development
- Booking and pricing system development
- Third-party API and CRM integration
- Payment gateway integration
- Conversion tracking and analytics implementation
- Production debugging and QA
- Independent project ownership
- AI-assisted development with manual code review
